

ENCORE CERAMICS

Glaze & Size Variation Is the Signature of Handmade Tile

Handmade ceramic tile bears the marks of the human hand—subtle shifts in color, texture, glaze, and size no machine can replicate. These variations are the essence that makes each piece alive, creating a surface full of dynamic character.

DREAM

PRECOCIOUS GLAZE

A rusty amber that can range to gold or to yellow, with high movement opalescence, including pink and purple tones. Pool and thinning dramatically increases color hue and opalescence on carved pieces. Glaze breaks will occur on relief revealing touches of golds and rusts.

High glaze movement | High color range

Smaller pieces: Expect each piece to vary greatly from light to dark.

Medium + Larger pieces: The hand applied glaze application will give you a full range of tones.

Carved pieces: Expect to see pooling in deeper areas and a lighter application on high areas.

EXPECT TO SEE ANY OR ALL OF THIS RANGE

Natural variation in color occurs as raw materials subtly change over time
